(c) and (d) Government have been pressing the owners and Governments of flag states of hijacked vessels to secure the release of the Indian nationals on board the hijacked vessels quickly. Diplomatic channels are used to mount pressure on them. The following preventive steps have been taken to protect the Indian flag vessels—

(1) Movement of Indian flag vessels is closely monitored in known piracy infested areas through regular contact between the Directorate General Communication Centre and the vessels' Ship Security Alert System.

(2) Indian Navy has deployed warship to patrol the Maritime Security Patrol Area in the Gulf of Aden. Indian ships along with foreign ships with Indian nationals have been informed of the same so that they can take advantage of the warship's presence while transiting through Gulf of Aden.

(3) India's position is that greater coordination is needed under the umbrella of the United Nations so that countries and organizations contributing warships such as North Atlantic Treaty Organisation (NATO), Operation Atlanta of the European Union and warships of individual nations, including India, could coordinate efforts aimed at enhancing the security of these sea lanes. Further, the international community, having recognized this problem brought this issue up in the Security Council of the United Nations which adopted four resolutions in 2008. India has contacted several countries to support this approach.
